

# CHINCHILLAS - UPDATE NOTES

## A Note to Users All Versions are Year 2000 Compliant.

### Version 2.51 (1/2/03)

- Fixed a password problem in the years & help file!
- Fixed an error with the demo!
- The location field now only pulls the dam's location if it is a newborn (prevents accidentally updating old records when linking pedigree)!
- The sire now only looks up the animals number not all 4 bind values! (also fixed on many reports)
- Once software expires it now forces user to register.
- New \_animal field only displays the appropriate bind value
- You can now double click on any of the files to open the database.
- Upgraded the engine to be Windows XP compliant, fixes several printing problems with older versions!

### Version 2.50 (6/12/01)

- You can now use the unique animal number generated by the program, the tag number, record number OR alt identifier field to link pedigree information!!!!
- New Tabular interface for easier navigation
- New Report printouts give users more options (sort, date range, preview), print more accurately on more printers!
- Changed number incrementing routine for increased accuracy.
- Pedigree shows more generations!
- Location field was inverted on some printouts!
- removed unused layouts!
- new registration routine!
- Daily Check list now shows animals to be born & weaned for 3 days (yesterday, today & tommorrow). They also now sort by location.!
- Added easy navigation to Dam & Sire records.
- Added Windows Support for new Windows versions Win 98, 2000, ME

### Version 2.42 (4/5/99)

- \*The wrong pop-up list for the row & section on the find screen were corrected!

### Version 2.40 (10/28/98)

- \*Evaluation of male breeder shows a summary of the female's their breeding with!
- \*Added ability to separate sale list by status type.
- \*Corrected several help items to reflect databases current capabilities.
- \*Users can now easily change year letter preferences file to meet needs of their particular country. US breeders should stick with the supplied US standard for letters.
- \*Added "Pedigree" status to status list for animals that are in your database only to show the pedigree of one of the animal's you own.

### Version 2.34 (10/98)

- \*Corrected a location mistake that reversed the section and row number values. Some versions may need to import section data into the row field and row field data into the section field. This also corrects the subsequent sorting problem with this information.
- \*Added error checking to animal pedigree

### Version 2.27 (8/15/98)

- \*Added ability to auto add an animal's pedigree. Particularly useful if adding pedigrees for purchased animals.
- \*Corrected birthweight field to allow entry on general info screen.
- \*Integrated modern printing capabilities to input screens.

### Version 2.26 (6/13/98)

- \*Corrected some minor bugs.
- \*Put links for upgrade of help file by downloading from website.
- \*Added some import options.

### Version 2.25 (6/10/98)

- \*Changed Prefs file to allow distribution via CD-Rom

### Version 2.23 (2/2/98)

- \*upgrade button now returns to main menu and sets the prefs file to open to the main menu.

### Version 2.21 (2/2/98)

- \*Corrected a bug that was causing the program to expire when all animal records are deleted.
- \*Completed upgrade from 2.05-2.16 to 2.2X version
- \*Demo now upgradeable to full version
- \*Daily check sheets now print without the first record that says "Do Not Delete"
- \*First record that says "Do Not Delete" is no longer needed.
- \*Fixed minor splash screen bug
- \*Added the ability to add multiple offspring from the Dam & Sire evaluation screen by simply clicking into the scrollable list and adding a new one at the bottom of the list.

### Version 2.20 (1/9/98)

- \*Integrated Years file to allow breeders from other countries such as canada to specify their own year letter designations
- \*Integrated Prefs file to allow users to upgrade from the web site!

### Version 2.15 (10/18/97)

- \*Demo version released

### Version 2.14 (8/18/97)

- \*Corrected a bug that sometimes caused the program to stall at the splash screen.

### Version 2.13 (3/12/97)

- \*Added Demo Version Capability.
- \*Corrected a minor bug preventing users from returning to main menu if print daily check list part I was cancelled.

### Version 2.11 (3/7/97)

- \*Set the birth date field to align text right on the dam & sire evaluate screens. Also removed the 2nd pelt avg field from the dam evaluation screen since it is not the pelt average for just this year but for all years!

### Version 2.10 (2/28/97)

- \*Evaluation printouts made to be collanseable
